Assignment #2
Stakeholder Identification

Printed: 05.10.2026

Identify the most important project stakeholders. For each of them specify:

1. Involvement in the project (and type of interest in the project – positive/negative).
2. Knowledge and competence level.
3. Expectations (of the stakeholder towards your product).
4. Potential influence on the project.

Example of a stakeholder for a project that delivers a new gaming console:

Game publishers

- Type of interest: positive.
- Involvement: will sponsor development of games and publish games for the new console.
- Knowledge / competence: high.
- Expectations: high initial console sales, high number of preorders, good publisher / platform owner split, implemented measures to prevent / limit resale of used games.
- Potential influence: high, good availability of third party titles is important for a new console, especially at launch.
